In the Matter of	
Amendment of Section 73.202(base) Table of Allotments) MB Docket No) RM-
FM Broadcast Stations	ý
(Butte Falls and Netarts, Oregon)
To: Office of Secretary	
Attn: Assistant of the Cl	nief, Audio Division
Media Bureau	

PETITION FOR RULEMAKING

Oregon Radio Partners, LLC ("Petitioner") hereby submit the instant Petition for Rulemaking to amend the FM Table of Allotments in order to further the Commission's allotment priorities as follows:

Community	<u>Present</u>	Proposed
Butte Falls, OR		290A
Netarts, OR		232C3

Background:

This Petition for Rulemaking is filed as part of a "hybrid" contingent proposal, involving both this rulemaking proposal and minor change applications. *See Report and Order in MB Docket No. 05-210*, FCC 06-163, released November 29, 2006 at para. 17.

Unit A 9 C D E 1 0 7 - 70

Petitioner proposes the allotment of Channel 232C3 to the community of Netarts, Oregon as that community's first local transmission service. This proposal is shortspaced under Section 73.207 of the Commission's Rules to Station KTIL-FM, Tillamook, Oregon. In order to eliminate that shortspacing, Oregon Eagle, Inc. ("Oregon Eagle"), licensee of Station KTIL-FM, has contingently proposed to change its channel from Channel 232C3 to Channel 232C2 at a new antenna site and change its community of license from Tillamook, Oregon to Government Camp, Oregon, as that Community's first local transmission service. Oregon Eagle has filed a 301 Application to make this minor change.

The KTIL-FM proposal is shortspaced to Station KXIX(FM), Bend, Oregon, presently operating on Channel 231C0. In order to eliminate that shortspacing, Oregon Eagle in its 301 Application has requested that the Commission issue an Order to Show Cause to GCC Bend, LLC ("GCC"), licensee of Station KXIX as to why its licensed channel should not be substituted with Channel 225C0 at its current site. Oregon Eagle has stated that it will reimburse GCC for its reasonable expenses in changing KXIX's channel to 225C0.

The KXIX substitution of Channel 225C0 at Bend is, in turn, shortspaced to Station KRXF(FM), Sunriver, Oregon, presently operating on Channel 224C2. In order eliminate this shortspacing, Oregon Eagle in its 301 Application has requested that the Commission issue an Order to Show Cause to Field Pond Group ("Field Pond"), licensee of Station KRXF as to why its licensed channel should not be substituted with Channel 231C2 at its current site. Oregon Eagle has stated that it will reimburse Field Pond for its reasonable expenses in changing KRXF's channel to 231C2.

The KXIX substitution of Channel 225C0 at its licensed site is also shortspaced to Channel 225A at Butte Falls, Oregon. James D. McDaniel ("McDaniel") has filed an auction application for the Bend station (BNPH-20060310ACD). McDaniel previously filed his application for Channel 225C3 at Butte Falls, but has amended his application to substitute Channel 225A at Talent, Oregon as that community's first local FM service.

As part of the contingent "hybrid" proposal, Petitioner also seeks the allotment of Channel 290A at Butte Falls, Oregon, so that Butte Falls may retain a first local broadcast service.

Discussion:

Petitioner has filed 301 Applications for Channel 290A at Butte Falls and Channel 232C3 at Netarts, Oregon. Approval of the entire "hybrid" proposal will result in the assignment of two first services to communities as well as a replacement first service to another community and a first competitive service to another. It will also result in additional service to 260,753 persons over an area of 15,038 kilometers, with a loss area of only 31,167 persons over an area of 4,294 kilometers. Exhibit 1.

Netarts, Oregon

Petitioner proposes to allot Channel 232C3 to Netarts, Oregon. As demonstrated by the attached channel study, Channel 232C3 can be allotted to Netarts in compliance with the Commission's spacing rules if KTIL-FM changes to Channel 232C2 at a new site. A 70 dBu signal can be provided to Netarts from the proposed reference point.

Exhibit 2. The allotment reference coordinates will provide a direct unobstructed "line of sight" path to the community of Netarts. Exhibit 2. As noted above, Petitioner has filed a 301 Application specifying the new channel and it will construct its facilities when that

application is granted. Netarts is a community for allotment purposes. It is a Census-Designated Place, located in Tillmook County and listed in the 2000 U.S. Census with a population of 744 persons. It is, therefore, presumed to have the status of a community for FCC allotment purposes. *See Arnold and Colombia, California*, 7 FCC Rcd 6302 (1992).

Netarts is located just off US Highway 101, a short distance from Tillamook.

Netarts is the gateway to Netarts Bay where fishing and crabbing are common.

Renowned as one of the most beautiful areas on the Oregon Coast, Netarts is an excellent place to rest, relax and enjoy the scenery and wildlife of the Pacific coastline.

The earliest reference to Netarts was in 1841 when Reverend John H. Frost, Solomon H. Smith and Lewis Taylor, from the Mission at Clatsop Plains, traversed the east site of Netarts Bay, proceeding over Cape Lookout, and around Sandlake en route to the Willamette Valley.

In 1853, Tillamook County was created by the Oregon Territorial Legislature. In 1859 Oregon was admitted as a state. The Federal Homestead Act was passed in 1862 and that same year witnessed the first Donation Land Claim on the Netarts Spit. The first settlement of the Netarts Bay was made in the fall of 1863. In 1867 the first house was built in the Netarts area. The first post office opened in Netarts on October 9, 1871.

In 1906, George W. Phelps built the first store in Netarts, just west of Happy

Camp. The oldest still-standing structures in the Netarts area were erected in the 1920's.

The U.S. Postal Service has assigned a zip code, 97143, to Netarts. A number of businesses are located in Netarts, including Netarts Grocery, Netarts Table Factory, The Terrimore, Lodging by the Sea, Edgewater Motel and Vacation Rentals, Sea Lion Inn,

JUMP AGREEMENTS/ORP PETITION FOR RULEMAKING 012407.doc

Surf's Up Salon and Day Spa, Happy Camp Resort, Netarts RV Park, Big Spruce RV Park and Marina, 101 Business Brokers, Banks Construction, Three Capes Vacations, Converse Vacation Rental, Netarts Cottages by the Sea, Land's End Concrete, New West Welding, T.P. Freight Lines, Inc. and Prudential Northwest. Exhibit 3.

Butte Falls, Oregon

Petitioner proposes to allot Channel 290A to Butte Falls, Oregon. As demonstrated by the attached channel study, Channel 290A can be allotted to Butte Falls in compliance with the Commission's spacing rules and a 70 dBu signal can be provided to Butte Falls from the proposed reference point. Exhibit 4. The allotment reference coordinates will provide a direct unobstructed "line of sight" path to the community of the Butte Falls. Exhibit 4. As noted above, Petitioner has filed a 301 Application specifying the new channel and it will construct its facilities when that application is granted. Butte Falls has already been determined by the Commission to be a community for allotment purposes. It is incorporated with a 2000 U.S. Census population of 439 persons. It is governed by a mayor and town council and has been assigned the zip code, 97522. Butte Falls also has its own school district and library.

Conclusion:

The Commission should promptly issue a Notice of Proposed Rulemaking proposing the allotment of Channel 290A at Butte Falls, Oregon and Channel 232C3 at Netarts, Oregon as proposed herein. Moreover, the Commission should approve the

"hybrid" application/rulemaking proposal which will result in the provision of first local services to Netarts and Government Camp, Oregon, a replacement first service to Butte Falls, Oregon, and a first FM service to Talent, Oregon.

Respectfully submitted,

OREGON RADIO PARTNERS, LLC

Technical Narrative

Overview

Six changes to the FM Spectrum are proposed. Two are minor changes and two are new allotments. For each a Form 301 is being concurrently filed. Finally, two changes require involuntary channel changes to operating facilities.

This "hybrid" proposal contemplates first local services at Government Camp, Oregon and at Netarts, Oregon. By the reassignment of two operating FM stations (KXIX-FM, Bend, Oregon and KRXF, Sunriver, Oregon) to new channels with no change in power or coverage, it is possible to provide service to the previously unserved communities. The remaining changes to the Spectrum either accommodate the reassignments or preserve service and listener choice for the future in areas where signals are proposed to be moved or modified.

The proposal is described in the entirety for the convenience of the FCC staff but the actual requests, to the extent they require the simultaneous, indexed filing of minor change applications, are made by the applications themselves unless otherwise directed by the Report and Order in Docket 05-210.

I. NEW 232C3 Netarts, OR

Upon modification of KTIL-FM to Government Camp, Oregon, it is possible to allot a NEW 232C3 at coordinates 45° 27' 56" North Latitude, 123° 58' 11" West Longitude thus providing the community of Netarts with a first local aural service. Netarts is a Census Designated Place and home to some 744 persons. This new allotment is included in the remaining services study for the modification of KTIL-FM. The modification of KTIL-FM and the grant of this new allotment result in the creation of only one new area of reduced service. In this area only four interference free services (where previously there were five) are available to 22 persons in this area of 20.8 square kilometers.

A form 301 and associated exhibits is being prepared and filed concurrently with this petition pursuant to the Report and Order in Docket 05-210.

II. Modification of KTIL-FM from Tillamook, OR to 232C2 Government Camp, OR

KTIL-FM 232C3 Tillamook, Oregon seeks to be modified to channel 232C2 as a new first local transmission service to the community of Government Camp, Oregon. The proposed reference site of 45° 20′ 01″ North Latitude 121° 42′ 45″ West Longitude for KTIL is mutually exclusive with the licensed facility of KTIL. This modification, along

with the other changes described in this "hybrid" proposal, are compliant with all the requirements of 47CFR §73.207 and 47CFR §73.315.

The Tillamook and Government Camp allotments share no overlap of hypothetical interference free service. Reallotment would provide a gain of 95,174 persons in an area of 8,530 square kilometers. The loss area is 2,637 square kilometers and contains 24,041 persons. The majority of the loss area receives five or more services, provided the herein proposed 232C3 is allotted at Netarts, OR.

III. Change Channel of KXIX-FM to 225C0 Bend, OR

Channel 225C0 can be assigned in compliance with 47CFR §73.207 at the licensed KXIX site, with the exception of two short spacings. One of these short spacings is to licensed site of KRFX 224C2 at Sunriver, OR. The other is to the pending application for channel 225C3 at Butte Falls, OR. These short spacings are eliminated by subsequent changes put forth within this hybrid proposal. No hypothetical coverage or line of sight exhibits are provided for this channel substitution, as it is proposed to substitute 225C0 at the present licensed site of KXIX. This "hybrid" proposal seeks the licensee of KXIX-FM to show why 225C0 should not be substituted for the licensed 231C0.

A channel study depicting the proposed channel change is included where appropriate in the forms 301 filed concurrently with this petition pursuant to the Report and Order in Docket 05-210.

IV. Change Channel of KRXF to 231C2 Sunriver, OR

The first short spacing of a related allotment encountered in the channel change of KXIX-FM is channel 224C2 for Sunriver, Oregon. This proposal substitutes channel 231C2 for 224C2 at Sunriver.

No hypothetical coverage or line of sight exhibits are provided for this channel substitution, as it is proposed to substitute 225C0 at the present licensed site of KRXF. This hybrid proposal seeks the licensee of KRXF-FM to show why 231C2 should not be substituted for the licensed 224C2.

A channel study depicting the proposed channel change is included where appropriate in the forms 301 filed concurrently with this petition pursuant to the Report and Order in Docket 05-210.

V. Modification of 225A from Butte Falls, OR to Talent, OR

This "hybrid" proposal proposes the modification of channel 225 from Butte Falls, Oregon to Talent, Oregon. Channel 225 can be allotted as a class A facility in full compliance with 73.207 spacing requirements at 42-18-05 North Latitude 122-44-38

West Longitude. This modification to Talent also complies with all requirements of community coverage. Talent presently has service only from KSJK-AM. This is a class C AM and, like many such facilities, suffers badly from nighttime interference. The NIF for KSJK-AM is approximately 25 mV/m. There is also a pending application for a new AM for Talent. This would be the first FM service for the Talent community.

The modification of Channel 225 from Butte Falls to Talent creates a loss area of 1,657 square kilometers and a gain area of 1,657 square kilometers encompassing 138,706 persons. 7,126 persons would lose service as a result of the reallotment. All of this loss area is well served provided that the proposed NEW 290A at Butte Falls is granted, with five or more full time interference free reception services, with the exception of a small area of four services.

A form 301 and associated exhibits is being prepared and filed concurrently with this petition pursuant to the Report and Order in Docket 05-210.

VI. NEW 290A at Butte Falls, OR

Butte Falls has proposed service from applied for channel 225A. The winning bidder for the Butte Falls Construction Permit, James McDaniel, has sought a one-step upgrade to 225C3. Channel 225 is the sole transmission service to Butte Falls.

In order that Butte Falls retain local service, it is proposed that 290A be allotted to Butte Falls at Latitude 42° 36' 19" Longitude 122° 24' 38". A hypothetical class A facility at the proposed reference site is fully compliant with 47 CFR §73.207 and 47 CFR §73.315.

A form 301 and associated exhibits is being prepared and filed concurrently with this petition pursuant to the Report and Order in Docket 05-210.

Summary

As the foregoing demonstrates, the net result of this hybrid proposal is first local transmission services to two worthy Oregon communities totaling 1,164 persons. No community would suffer the loss of its sole transmission service. Additional interference free service choices would be available to some 260,753 persons in 15,038 square kilometers while only 31,167 persons would experience loss in the loss areas of 4,294 square kilometers. There are no individuals that would be underserved as a result of the plan put forth in this hybrid proposal.

Renowned as one of the most beautiful areas on the Oregon Coast, Three Capes Scenic Loop is the home of The Terimore, Lodging by the Sea. Located off the beaten path in Netarts, Oregon, The Terimore rests in the heart of natural scenic beauty. It's an excellent location to rest, relax and enjoy your next escape to the Oregon Coast.

The Terimore

- Spectacular Bay and Ocean Views
- Choose from Cabins, Cottages or Motel Roon
- Kitchen units with fireplaces are available
- Color TV with HBO & ESPN
- Direct Dial Phones
- Wireless Internet available in some units

"The gentle rhythm of the surf at bayside draws ripples of an evening summer sunset to your sand covered feet. Knowing you have set aside this time you stand gazing at the changing patterns of evening while pelicans frolic among the laughing seagulls...you watch them play and glide in the bracing, misty ocean breeze."
